DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1, 2, 4 and 5 have been considered but are moot in view of the new ground(s) of rejection.

Despite applicant's disagreement, the examiner decides to provide new rejection as below. Other references have been incorporated to strengthen the examiner's position with respect to the computer-readable medium containing programming instructions for controlling brightness from a display unit.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Oshikoshi (U.S. Patent number 5,042,078)

Regarding claim 1, Oshikoshi discloses a computer-readable medium (15, 18, 20, 21, 24, 49) (Fig. 1) containing programming instructions for controlling brightness from a display unit, the programming instructions comprising:

Art Unit: 2821

calculating a display brightness in a certain window displayed on a screen of said display unit (Fig. 1, col. 3, lines 20-68. col. 4, lines 1-57); and

controlling said display unit so as to change said brightness of said display unit according to said calculated display brightness (Fig. 1, col. 3, lines 20-68. col. 4, lines 1-57).

Regarding claim 4, Oshikoshi discloses a method for controlling brightness form a display unit comprising:

calculating a display brightness in a certain window displayed on a screen of said display unit (Fig. 1, col. 3, lines 20-68. col. 4, lines 1-57); and

controlling said display unit so as to change said brightness of said display unit according to said calculated display brightness (Fig. 1, col. 3, lines 20-68. col. 4, lines 1-57).

Allowable Subject Matter

3. Claims 2 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the prior art teaches the computer-readable medium contains the programming instructions using the power management function for controlling the display unit so as to change the screen brightness of said display unit.
